Relaxing entertainment

Colour Your Bathroom

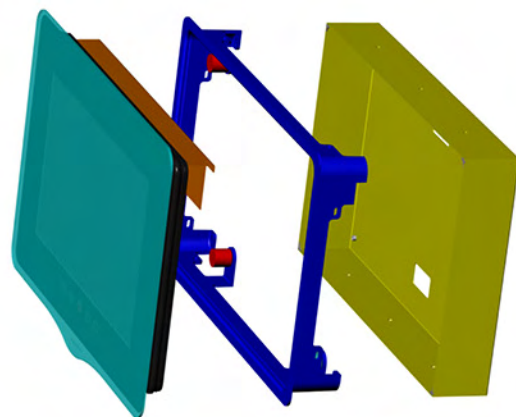

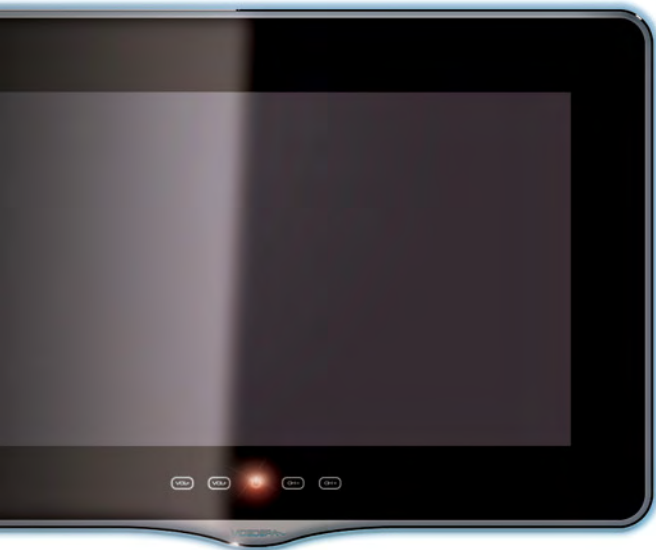

A colourful leisure experience is assured with a Videospa installation in your bathroom. The unique, beautiful design of Videospa offering a choice of vibrant finishes will enhance the aesthetics of your bathroom decor.

Dazzling full HD, LED delivered video and off-air transmissions will breathe a world of colour and imagination into your bathroom....Keep up-to-date on the news, sports and financial markets. What better way to start each day!

"Audio that equal's the video quality"

Videospa provides precise digital and analogue audio via the discreet, waterproof, ceiling mounted speakers. We pride ourselves on knowing that we have paid as much attention to sound quality as we have the visuals – "The devil is in the detail" as they say.

VIDEOSPA

Fluid Engineering

At Videotree we have pioneered the manufacturing of luxurious, waterproof bathroom televisions. Our waterproof global product brands are specifically designed to be installed within luxury hotel bathrooms, spas, gym's and innovative designer residential homes. Videospa is UK owned, designed and manufactured. Our Videospa range of bathroom Televisions are IP 66 rated and can even be installed directly underneath the shower.

Our unique capacitive touch control technology means that you can change channel, adjust volume and turn the TV on and off even while you are showering without having to search around for the remote control.

"Ultra Modern 3D design ensures perfect form and function"

Utilising the latest in 3D computerised design technology, coupled with our creative in-house design team approach, Videotree televisions have attracted many admiring comments from the world's finest, high level, interior designers. Experts from the field of bespoke bathroom design, hotel interior designers and leading architects have all admired the unique aesthetic appeal of Videospa and benefit from creating visualisations around it.

Designed And Made In England

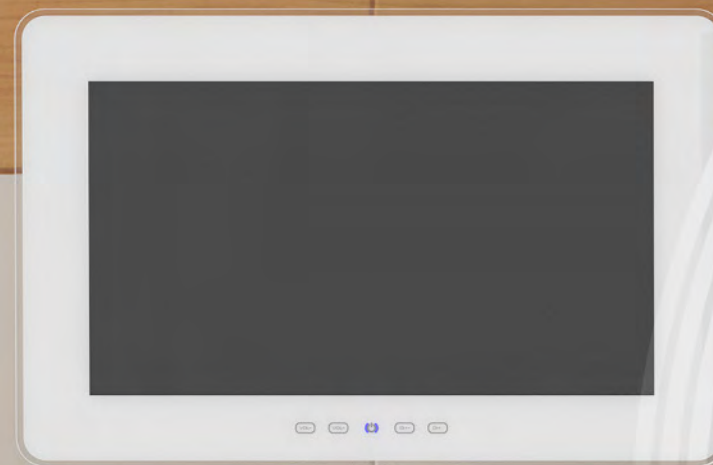

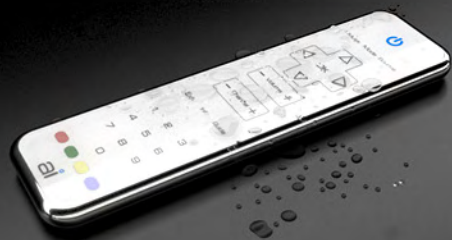

Innovative Design & Stunning Looks!

Our aspiration for VIDEOSPA is to match form with function, not an inconsiderable task. VIDEOSPA has to look as good as it performs! Not only does VIDEOSPA offer the most advanced performance features available complimented by unparalleled build quality, but aesthetically it is unique amongst its peers having been designed to positively enhance its surroundings.

VIDEOSPA has the 5 star hotel allure that is so often sought after, with TV, video and audio images to compliment.

Our standard colours are Pearl White, Gloss Black and Tinted Mirror, but we can offer customised finishes for specialist designs and boutique hotels if desirable.

VIDEOSPA

The Technology

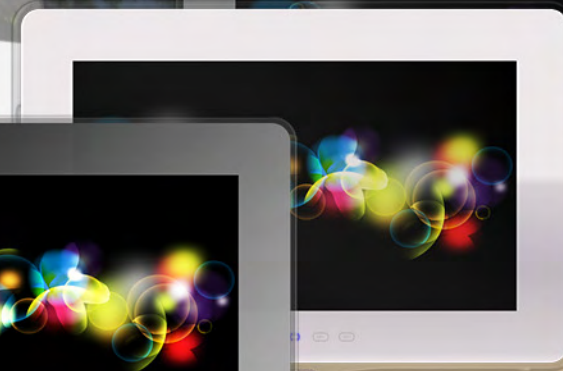

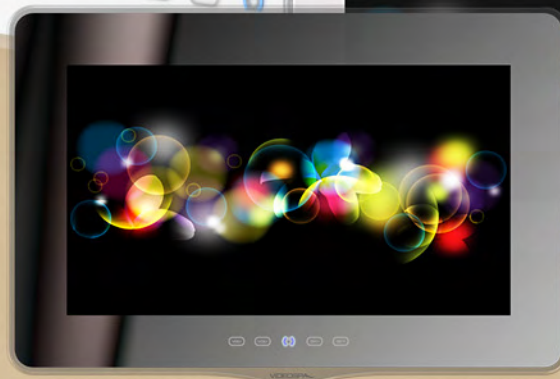

Our unique and innovative range of waterproof televisions utilise Projected Capacitive Touch (PCT). PCT technology is a capacitive technology which permits more accurate and flexible operation directly from the front fascia of the unit. Coupled with the standard, supplied waterproof remote control, you can operate the functions of the TV directly from the front of the screen at the touch of a button...Even under the shower!

Some of the exclusive features of our waterproof televisions are in the attention to detail. These are products that no one else manufactures. We celebrate the fact that our design quality and consummate aesthetics are unparalleled and that features such as touch screen control are unique to us.

Available in 19" and 27" and 3 standard colours

Beautiful from all angles

The brand new ai Universal Remote control from Videotree

Universal Learning Technology:

The new ai Universal remote is like all Videotree products, the "first" of its kind. This beautiful, stylish remote control will quickly learn the codes from your IR controlled AV equipment, providing you with one user handset to control all of your audio visual products!

Touch control Operation

The ai Universal remote has a flat touch screen surface, which provides positive touch sensitive control. With the Videotree ai remote you can say goodbye to small, fiddly buttons that harbour germs and grime. The working surface of the ai remote can simply be wiped clean using a damp cloth.

Motion Activated

The Videotree ai Universal remote control is motion activated. When your controller is not being used, it will "go to sleep" ensuring that no battery power is wasted when ai is not being used. Simply pick up or touch the handset and AI will instantly wake up and be instantly ready for use!

Water Resistant

Like all Videotree products, Our ai Universal remote control is water resistant. If you should experience an accidental liquid spillage or, handle the remote with wet or sticky hands, ai will be unaffected. You can then simply wipe your ai clean using a damp cloth.

Magnetic Wall Mount

ai can be stored on your wall next to your AV equipment. The powerful magnetic wall mount (as standard) provides a safe and efficient storage place for your ai controller fixing it in place quickly and efficiently

Wireless Inductive Flatbedging (No batteries required)

ai features an integrated slim line, rechargeable Li-ion battery which means that your handset can be recharged wirelessly.

Beautiful Desirable Aesthetics

The design idea behind our ai remote is simple. We wanted to create a versatile, water resistant, universal learning remote control for the home which would look beautiful and stay looking beautiful over time. We wanted to offer the only remote control for home use that you will ever need to purchase. Put all of your plastic, cluttering remote controls away and use just one sexy looking remote control to operate all of your homes AV equipment. The ai universal remote control will probably be the best audio visual accessory investment that you will ever make!
