ker

Ceramic
— in —
essence

Stone, cement, wood... basic materials which
are interpreted to adapt them to new trends.
Textures, finishes and reliefs with added value.
Natural and calm colors to fit in any environment.

**This is the essence of Ceramics.
This is NEWKER.**

Piedra, cemento, madera... materiales básicos
reinterpretados para adaptarlos a las
nuevas tendencias.
Juegos de texturas, acabados y relieves
que aportan un valor añadido.
Colores naturales y tranquilos capaces
de encajar en cualquier ambiente.

**Esto es la esencia de la Cerámica.
Esto es NEWKER.**

* Debido a la especial textura de esta serie, para su colocación, recomendamos usar la menor cantidad posible de material de rejuntado, evitando esparcirlo sobre la pieza. El material de rejuntado debe ser limpiado de la superficie del azulejo antes de su secado, con una esponja no abrasiva, jabón neutro y agua.

* Due to the special texture of this range, for installation, we recommend using the smallest possible amount of grout material, avoiding over grouting the piece, just the joint. The grout must be cleaned off the surface of the tile before it has dried, with a non-abrasive sponge, mild soap and water.

TILE-LAYING RECOMMENDATIONS | CONSEJOS DE COLOCACIÓN

- All our products must be installed following the instructions detailed in Norm UNE 138002:2017 “Reglas generales para la ejecución de revestimientos con baldosas cerámicas por adherencia”
- Please check the size, caliber, tone, colour, quality of the pieces before the installation and if there is enough product to finish the work.
- When interlocked laying, 20% of length in each piece must not be exceeded.
- Use of suitable adhesives for each kind of product and surface.
- As general rule, tiles must be installed in the same position. This position is indicated with a sign in the back side of each tile (arrow or similar).
- The minimum joint is 1.5 mm although we suggest a higher joint for big size products. To ensure the continuity for the 3D wall tiles, we advise a 2 mm joint.

LEVELLING SYSTEM

Levelling system ensures flatness between tiles avoiding movements during the mortar setting. This reduces the time for the ceramic laying obtaining a perfect lippage-free finish. Applications and main features:

- Recommended in formats from 60x60 cm | 24"x24"
- Flatness between tiles is guaranteed and laying time reduced.
- Avoid movements between the tiles due to the mortar setting.
- We do not recommend its use in rectified white body wall tiles. They can be chipped when the wedges are removed, as these products do not have the strength of the porcelain tiles at the edges.

Steps to follow

1. First, set the tool to the scale according to the ceramic thickness. 2. Introduce the crossheads and continue laying the adjacent tiles. 3. Put the wedges in the crosshead manually. 4. Tighten the wedges with the pliers to level the pieces. 5. Allow for setting for the time recommended by the manufacturer of the adhesive cement. 6. Remove the crossheads. Hit the crosshead with a rubber mallet or with your foot in the direction of the joint. Do not hit the wedges..

*The company will not accept any claim if this is due to the problems caused by not following these suggestions and instructions.

-
- Todos nuestros productos deben colocarse siguiendo las indicaciones descritas en la Norma UNE 138002:2017 “Reglas generales para la ejecución de revestimientos con baldosas cerámicas por adherencia”
 - Comprobar el formato, calibre, tono, color y calidad de las piezas antes de empezar la colocación. Comprobar que se dispone de producto suficiente para completar la obra.
 - En colocación trabada, no sobrepasar el 20 % de la longitud de la pieza en el trabado.
 - Utilizar los adhesivos adecuados para cada tipo de producto y de superficie de colocación.
 - Como norma general, se deben de colocar todas las piezas en la misma posición. Esta posición se indica en la parte trasera de las piezas con un símbolo (flecha o similar)
 - La junta mínima de colocación es de 1,5 mm. Para asegurar la continuidad de los relieves de revestimiento, aconsejamos una junta de 2 mm.

SISTEMA DE NIVELACIÓN

El sistema de nivelación asegura la planeidad entre baldosas; evitando los movimientos durante el fraguado del mortero. Con ello, reduciremos los tiempos de colocación de la cerámica; consiguiendo un acabado perfecto y sin escalones. Aplicaciones y características principales:

- Recomendable en formatos a partir de 60x60 cm.
- Asegura la planeidad entre baldosas y reduce los tiempos de colocación.
- Evita movimientos entre piezas, debidas al fraguado del mortero.
- No recomendamos su uso en revestimientos de pasta blanca rectificadas. Pueden producirse desconchados al retirar las cuñas, pues estos productos no tienen la resistencia de los porcelánicos en los bordes.

Pasos a seguir

1. Primero debemos ajustar la herramienta en la escala, según el espesor de la cerámica. 2. Introduciremos los calzos y continuaremos colocando las baldosas adyacentes. 3. Colocar las cuñas en el calzo manualmente. 4. Apretar con un alicate las cuñas para enrasar las piezas. 5. Dejar fraguar el tiempo recomendado por el fabricante del cemento cola. 6. Eliminación de los calzos. Golpear el calzo con la maza o el pie en el sentido de la junta. No golpear las cuñas.

* No se admitirá ninguna reclamación en la que los problemas estén causados por no tener en cuenta estos consejos.
